THURSDAY MORNING, JUNE IT 1880

TOO MUCH BUYING ABROAD.

One of our easis, n exchanges in an elaborate at article on our foreign purchases remarks the fact that the statement of the foreign trade statistics of the United States up to the close of April, shows one prominent characteristic which deminds serious consideration. It is the increasing tendency on the part of the American people, for an enormius outlary in toreign products and luxuries During the month of April our imports of foreign merchandize reached \$74,388,800 against \$42, 138,101 for the same period in 1879. During March and April the Imports into the United States and States Stars attained the enormous sum of \$141, 000,003. This equals, if it does not exceed, 900,003. This equals, the country upon foreign the expenditures of the country upon foreign the expenditures of the country areases; incommodities at the period of bur spraces; in the state of the country states of the state o the expenditures of the country upon foreign signed to fully account for this increase in expenditures, It shows a steady growth ex-landing back for nearly a year. The figures C. M. STEWART & CO. for the ten months ending April 30th give a total of imports of merchandise and specie amounting to \$633,100,000 against \$388,000. 000 for the same period in 1878-79, We thus have an increase of sixty-thre

per cent, in the imports of the current fiscal per cent in the imports of the current necest Special Anction Sale. movements on record. It is true that the importation of iron, which will probably cease with the last month, have largely contributed to make this increase, but onesine of that cause the figures indicate the disposi-tion of the people toward extravagance. White we have thus been increasing our for-eign purchases, our exportations of Amerithe ten months ending with April were \$152,-004,607, an increase of \$79,550,449; So that while we have retained a favorable balance of trade, it has suffered a severe reduction for the ten months specified from \$243,834,382 in 1878-0 to \$78.945.047. There is also a moder ate possibility, if the present movement keeps up, of the unter axido or of trade in our favor by the close of the ficoal year.
It is a well known fact that the United

States more than any other country contains among its own productions all the necessaries of life. We can be well fed, well housed, ing any important drafts on the productions of foreign countries. When we do go to foreign nations and make larg. expenditures, it SHYLOCK, MR. BANDMANN. uries, or for a large supply of foreign products which we world be duits as well off one own contains. In short the nation seems too soon to have prooften the lesson of soonomy which it larraed by such painful experience in the cream of 1873. The example of large expenditures in inxurious clothing and jawairy set, by the wealthier classes, has extended to the ranks of moderate wealth and thence to the people of ordinary and-limited means, but it is hoped that the severe check which has recently been pur upon damestic speculation and inwill also examine a wholesomely severe restrains apon expenditures for fo luxuries. Last fall the great business It was before. It has already found out its mistake and the discovery is likely to put an end to the periodal extravagance which was founded on the fieldlors increase of wealth during 1879. The beam in iron has already suffered quite a collapse, and the effect of the collapse will help stop or several management of cred to all. importation of that article; the restrictions to imaginary individual wealth will doubtes diminish the demand for European luxuries; and even if Europe should require Musical and Literary Enterless of our products this year than last, it is permitted to hope that a sufficient return to the practices of hirif will be made so that we son, Miss Lutio Weitedeld and others will statist. may still retain the balance of foreign trade in favor of this country. In earlier days even the people of O seon were able to do without every year to the extent of hundreds of thousands of dollars. Those pioneers who have been in Portland for a day or two past could teach even some of the so-called statesmen the useful and simple lesson of political economy which the Americans are slow to learn, but quick to forget, that the wealth of nations, communities or individuals is in what they have, and not in the extent of rade relations or the amount of the business adjourned, an event which might have oc-

curred some time ago and the country been none the worse off. What it has done for the benefit of its constituents, the record doss not show, and Mr. A unauderStephens' characterization of it, made some till e since, will apply eminently to the whole ession. It has been a constant task on part of the more skillink politicians to keep the hot headed members of the party in check, and but little however, has been tolerably successful, and the utterances have generally been such as do not need any particular defense or explantion before the country. The somewhat harry and the specied adjournment was promoty induced by the fear on part of the policy men that President Hayes' hist veto would so excite the fire-eaters that they would break over all restraint and "give the party dead away." The democratic mogols. too, wanted to go to Cincinnati and see what the sage of cipher alley proposes to do about the next victim to meet his tale at the hands of the republican candidate for the presi-

The Sen Francisco Francisco that shrice box of political slander and vicious men-dacity concerning the republican party and republican caudidates, has reached the den. peratic Organ in this city, and the latter revels in a column of gross misrepresentations and abuse of Gen. Garfield, a man against whom none of his political and nies of respectability have over made an accusation attaching to him the least shadow of dishonor in private or public life.

Congress sat until it found the republican purty had nominated a man for the presidency, the investigation of whose character would make no political capital for the demoorary; not finding anything in the life of Gen flarfield which would not bear the perfeet I got of truth, congress quietly dijourned, to allow us democratic members time to hunt ap some other issue and some other campaign

The wonderful reduction of the public deb fare 12 May, of \$14,928,033 St. combined with use during April of over \$12,000 p. d and or the ten months of the current liscal mearig \$75,000,000, makes a splendid inamual showing. At the present rate the nation will pay off over \$1.0,00000 of its dept this year, and could extinguish its entire
